

THE **NEXT** GENERATION IN RADIOLOGY REPORTING

PowerScribe 360 | Reporting

Why PowerScribe users should convert to PowerScribe 360 | Reporting?

PowerScribe® 360 | Reporting is a powerful reporting platform that combines speech recognition technology, data capture, multisite workflow and structured reporting in an integrated solution. This solution also provides peer review, transcription workflow, integrated clinical content and extensive administrative tools. PowerScribe 360 | Reporting also offers a Web Services API that allows healthcare facilities and third-party solution providers to integrate applications directly into this extensible platform.

INCREASED SPEECH RECOGNITION ACCURACY AND NEW FEATURES

With Dragon Medical 10, PowerScribe 360 | Reporting delivers speech technology with increased accuracy compared with what you are using today. On average, PowerScribe 5.0 customers will benefit from a 20% reduction in word error rate, and PowerScribe 4.x customers will benefit from a 50% reduction* in word error rate.

Radiologists will also benefit from:

- Additional international and regional user accent support
- Improved “Correct that” workflow
- Enhanced vocabulary management tools
- System-wide acoustic and language model assignment
- Expanded text formatting and auto correction functionality

* Individual results may vary

KEY BENEFITS

- **Dragon® Medical 10**
Industry-leading speech recognition technology provides increased accuracy and efficiency for your radiologists
- **Advanced Documentation and Workflow Features**
Provides enhanced flexibility and workflow options
- **Redesigned User Interface**
Delivers radiologists with efficient access to an expanded set of information in an interface customizable to meet individual needs
- **Next-Generation Radiology Platform**
Provides expandability and scalability beyond speech-driven documentation that will support your business requirements moving forward

POWERSCRIBE 360 | REPORTING: IMPROVED WORKFLOWS AND PRODUCTIVITY ENHANCEMENTS

The PowerScribe 360 | Reporting platform also provides new workflows and advanced features that make the radiologist more productive:

- More robust transcription workflow
- Optional integration with Dragon Medical 360 | eScripture platform
- Advanced macro and template capabilities:
 - Site, personal, and modality/anatomy relevancy mapping used to autosort the macro listing for the radiologist
 - Autoloading templates based on procedure code, gender, and patient age
 - New field types, including pick lists, merge, numeric, and custom fields
 - Fill-in fields remain intact after dictation to provide easy navigation back to fields for editing
 - “Findings only” dictation mode allows users to dictate freely and allows PowerScribe 360 | Reporting to structure the report
 - “Talking” templates speak the name of the report fields
 - Supports PowerScribe 5.0 shortcut import
- Wet read workflow support
- Resident workflow updates, including report reject options and unsigned report ownership acquisition
- PowerScribe 360 | Reporting Workflow Orchestrator*—provides unified radiologist worklist that can integrate multiple RIS and PACS
- Dedicated ACR RADPEER™-compliant Peer Review* module
- Access to clinical content through our PowerScribe 360 | Reporting Assisted Diagnosis* module
- Dedicated BI-RADS entry module

* Optional

“PowerScribe 360 | Reporting is the ideal companion to a busy workday, by increasing radiologist productivity through accurate speech recognition, and contributing to enhanced patient care through the rapid delivery of results to our referring physicians.”

— David S. Mendelson, M.D. FACR
Chief of Clinical Informatics MSMC
Professor of Radiology,
Director of Radiology Information Systems
Pulmonary Radiology
The Mount Sinai Medical Center, New York

POWERSCRIBE 360 | REPORTING: IMPROVED INTERFACE AND INFORMATION ACCESS

The PowerScribe 360 | Reporting user interface design provides the radiologist with access to more information, in order to improve productivity.

- Customizable user interface
- New context-sensitive online help updates
- New text highlighting features (plain text, dictated text, AutoText, and more)
- New browsing options:
 - Access to prior reports and ability to reuse report text in new dictations
 - Access to recent reports
- Ability to create patient and report audio/text notes
- Additional order data displayed in reporting window

- Ability to link/associate open orders before/during report dictation
- Ability to attach documents/images to the report or patient record
- Lightweight, browser-based portal for:
 - Radiologists to access reports remotely
 - Technologists to enter data
 - Referring physicians to access reports
 - Front-desk staff to scan documents

**POWERSCRIBE 360 | REPORTING:
UPDATED ADMINISTRATOR
FUNCTIONALITY**

- Full and restricted administrator access rights
- Enhanced order, report previews, and status updates

- Ability to easily retrieve report audio
- Ability to copy user preferences
- User-based and system access audit trail
- Report content download options, including report text, audio, and concordance data
- Robust report/patient audit trail with detailed data and report text versions for every report
- Real-time dashboard with enhanced inbound/outbound order activity
- Configurable acoustic and language model adaptation tools
- Configurable printing and fax templates, headers, and footers
- New management reports, including author productivity, editor productivity, turnaround time, report analysis, and AutoTexts

CAPTURE

A CLOSED-LOOP SUITE OF RADIOLOGY SOLUTIONS

PowerScribe 360 is the platform for future radiology business needs—beyond speech-driven reporting, documentation, and communication. PowerScribe 360 | Reporting acts as the central platform for all products in Nuance Healthcare's Closed-Loop Radiology Reporting and Communication™ Suite: clinical decision support, speech-driven radiology reporting, Critical Test Result Management (CTRM) and communications, and business intelligence and outcomes analysis.

PowerScribe 360 | Reporting provides:

- Expandable and scalable solutions for today's radiology business requirements
- True multisite, multi-tenant architecture
- Lightweight, browser-based portal for your administrators, radiologists, technologists, and referring clinicians
- Web Services API that provides an open platform for custom application development to better integrate with your IT infrastructure
- Support for the latest operating systems and platforms: Windows® Server 2008, Microsoft® SQL Server 2008, Windows 7 OS, Internet Explorer® 8.0, and 64-bit OS workstation support (32-bit emulation mode)
- .NET 3.5 Framework
- Support for VMware® virtual environments
- Support for Microsoft Failover Clustering

ABOUT NUANCE HEALTHCARE

Nuance Healthcare, a division of Nuance Communications, is the market leader in providing clinical understanding solutions that accurately capture and transform the patient story into meaningful, actionable information. These solutions are proven to increase clinician satisfaction and HIT adoption, supporting thousands of hospitals and providers to achieve Meaningful Use of EHR systems and transform to the accountable care model.

To learn more about how Nuance Healthcare can help you improve financial performance, raise the quality of care, and increase clinician satisfaction, please contact us at 800-350-4836 or visit www.nuance.com/healthcare.
