

ALL-IN-ONE TOOL TO MEET CORE MEASURE REQUIREMENTS

Clintegrity 360 | Quality Measures

Improve Core Measure Compliance

CHALLENGE:

How can I monitor our hospital's performance to ensure we receive maximum financial rewards now that we have moved from a pay-for-reporting to pay-for-performance environment?

SOLUTION:

Improve reimbursement and evaluate quality care with Clintegrity 360 | Quality Measures, a Nuance® Healthcare solution. Clintegrity 360 | Quality Measures enables fast, accurate, and easy capture of patient data required by the Joint Commission, Hospital Quality Alliance, and CMS to receive accreditation and full Medicare annual payment updates.

ALL-IN-ONE TOOL TO MEET CORE MEASURES

With regulatory agencies emphasizing clinical outcomes and evidenced-based medicine, you need a tool that can demonstrate how you provide quality care. Meet that challenge with the web-based Clintegrity 360 | Quality Measures module that identifies and evaluates abstracted patient data needed for core measure requirements to ensure that you receive full Medicare annual payments.

Using information from your facility's medical record program, Clintegrity 360 | Quality Measures will automatically search for patient data that requires core-measure reporting. Once identified, your staff will answer the standard questions required by the regulatory agency that created the core measure. For example, if a patient was admitted for acute myocardial

KEY BENEFITS

- Improves reimbursement
- Reduces time-consuming abstracting tasks
- Improves performance improvement activities
- Ensures accurate and complete transmission to regulatory agencies
- Increases level of understanding of core measures

All clients have consistently received 100% of their annual payment update from CMS with Clintegrity 360 | Quality Measures

infarction, a core measure question may ask whether he or she was given aspirin upon arrival. Questions not applicable to specific measures are also identified and can be skipped. Using Clintegrity 360 | Quality Measures, you can complete these questions concurrently or retrospectively, after the patient is discharged.

After completion of the questions, Nuance will ensure that core-measure data is sent directly to regulatory agencies. Nuance is one of the few vendors certified to format and send data transmission. You'll then receive reports on areas where you passed or failed for specific measures. Clintegrity 360 | Quality Measures also meets the stringent standards for measuring inter-rater reliability, which evaluates healthcare organizations' data abstraction processes.

FEATURES AND BENEFITS

- Improves reimbursement.** Clintegrity 360 | Quality Measures monitors your compliance with core measure requirements, positively impacting your level of reimbursement. Nuance can also submit data to state agencies to address requirements that go beyond national reporting.
- Reduces time-consuming abstracting tasks.** Clintegrity 360 | Quality Measures automatically identifies patients that fall into core measure categories—no searching necessary.
- Improves performance improvement activities.** Staff can answer all questions related to a core measure (rather than the minimum required) to track and monitor activities to a higher level of quality.
- Ensures accurate and complete transmission to regulatory agencies.** Clintegrity 360 | Quality Measures submits completed case data early, each quarter, and are able to notify you of errors in data elements, giving you time to correct inaccuracies.
- Increases level of understanding of core measures.** Rely on Nuance to monitor core measurement requirements and alert you when

new information is available. We even provide educational sessions on core measures through webinars, e-mail blasts, and client advisories.

ADDING MORE TO YOUR CORE MEASURE REPORT

Enhance your reporting options by utilizing the Clintegrity 360 | Quality Measures Reports Module. This module is included in the core product and provides more detailed reports than those required by regulatory or accrediting bodies. With Clintegrity 360 | Quality Measures, you'll know which measures you passed or failed, while Clintegrity 360 | Quality Measures Reports will tell you why. By using these reports concurrently during the quarter, you can quickly identify areas of improvement. Available reports can serve to assign compliance rates to physicians and more, and you can also use these reports in conjunction with credentialing activities. It's an ideal educational tool to evaluate and suggest focused training for your physicians.

ABOUT NUANCE HEALTHCARE

Nuance Healthcare, a division of Nuance Communications, is the market leader in creating clinical understanding solutions that drive smart, efficient decisions across healthcare. As the largest clinical documentation provider in the U.S., Nuance provides solutions and services that improve the entire clinical documentation process—from capture of the complete patient record to clinical documentation improvement, coding, compliance and appropriate reimbursement. More than 450,000 physicians and 10,000 healthcare facilities worldwide leverage Nuance's award-winning voice-enabled clinical documentation and analytics solutions to support the physician in any clinical workflow on any device.
