## DATASHEET

### eCopy Connector for Xerox® DocuShare®

Seamlessly integrate paper-based data into your DocuShare workflows

With the eCopy Connector for Xerox DocuShare, users can scan hardcopy documents to the DocuShare enterprise content management (ECM) system—directly from any eCopy ShareScan-enabled multifunction printer (MFP) or scanner—for secure information storage, retrieval, and collaboration. This dynamic, real-time connection lets MFP users send scanned documents to the same DocuShare Workspaces and Collections available from their desktops. Users spend less time scanning and more time focusing on their real work.

eCopy ShareScan's intuitive push-button interface takes the guesswork out of scanning, so users get the job done right the first time. eCopy's OmniPage® OCR engine delivers unparalleled recognition accuracy, transforming static images into searchable, editable documents. Support for Favorite Workspaces and Collections enables a personalized user experience at the MFP, letting users scan documents to frequently accessed DocuShare locations with the push of button, rather than navigating through the entire DocuShare structure. Time-saving features like field auto-population and type-ahead intelligence facilitate proper indexing so it's easy to retrieve the scanned information.

Get even more from your DocuShare investment. Let the eCopy Connector for Xerox DocuShare put your organization on the path to more productive scanning, faster information access, and significant cost savings.

The eCopy Connector makes your MFP an extension of the user's DocuShare experience.

### User Benefits:

- Add documents to DocuShare in a few simple steps without leaving the MFP
- Speed collaboration by integrating paper data directly into DocuShare—with no need for coversheets
- Transform static images into searchable documents as they are scanned for added value
- Create a streamlined, personalized user experience with support for Favorite Workspaces and Collections to complete scanning tasks even faster
- Be immediately productive; scan to DocuShare with no training required
- Get even more done at the MFP by further automating routine tasks with eCopy Document Extenders

### Administrator Benefits:

- Realize even greater value from your existing DocuShare investments
- Speed adoption and reduce support calls with push-button simplicity and a consistent user experience
- Create audit trails via user validation to ensure compliance with corporate security policies and government/industry regulations
- Keep the Connector and DocuShare in sync — even as the ECM environment is changed or updated —via dynamic integration
- Leverage flexible configuration options to accommodate specific workflows by department, user, or document type

### System Requirements:

- eCopy ShareScan Version 5 SP2 or SP3
- Xerox DocuShare Version 6.0 and above
- Microsoft® .NET Framework Version 3.5 must be installed on the eCopy ShareScan Manager Server

### Device Compatibility:
