

Google Docs Connector for eCopy™ Sharescan®

The Google Docs Connector for eCopy™ Sharescan® enables your Multifunctional devices to scan straight to your Google Docs collections and store your file securely. Your file is accessible from the powerful Google Docs web app available from a multitude of devices such as any web browser, iPhone, iPad, and Android. Your documents in the cloud.

Google Account Options

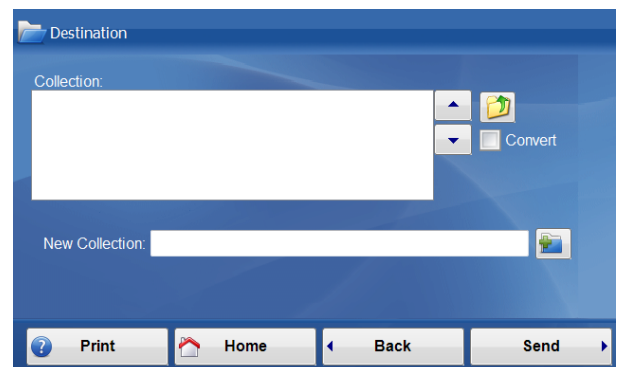

Choose Domain Locking and the MFD is locked to your Google Apps Domain. Choose Single Sign On and the MFD is locked to a single account. Alternatively leave the decision to the user to scan to Google Apps or their personal Google Account.

Three Log In options, Single Sign On, Domain Locking or Standard.

Powerful Options

Once logged in collections are displayed in real time. Choose to create new collection and scan straight to it. Optionally try out the convert feature and Google will attempt to convert the document to their format.

Choose or create the collection to scan to. Optionally attempt to convert to a Google document

Beta Print Works Feature

Included for no additional cost, an experimental and innovate feature. Now you can print from Google straight from your MFD. Don't waste time at your desktop, just browse for your document and print at the MFD.
