

ACCELERATE CLINICAL DOCUMENT CAPTURE

eCopy ShareScan for Hyland OnBase

Increase productivity, reduce costs, and improve the quality of care with distributed capture

CHALLENGE:

Healthcare organizations face significant challenges in delivering high-quality, accountable care, because much of the information needed to provide that care remains locked in paper form. These are just some of the problems organizations face in handling high volumes of paper:

- Centralized scanning processes can result in delays before documents are made available in the Hyland OnBase ECM
- Scanned records are often saved as simple tiff files and therefore cannot be quickly retrieved through a keyword search.
- Distributed capture platforms can be difficult to standardize, and often result in breaks in HIM scanning protocols.

SOLUTION:

eCopy ShareScan is a cost-effective, easy-to-deploy solution designed to accelerate capture using the MFPs (multi-function peripherals) and scanners you already own. eCopy ShareScan for Healthcare turns network scanners and MFPs into secure “on-ramps” to the Hyland OnBase ECM, accelerating access to patient data and making the patient record more complete.

KEY BENEFITS:

- Simplified integration through the OnBase eCopy Connector developed by Hyland Software
- Access to incoming paper records in Hyland OnBase in minutes
- Dynamic patient and document type look-ups for accurate indexing
- Additional integration with popular EHR, fax server, and business applications

eCopy ShareScan collapses multi-step scanning workflows into a few simple button presses at a scanner or MFP. With an interface as easy to use as a smart phone documents are scanned, indexed, and attached to the correct record in OnBase

IMPROVED CARE WITH ACCELERATED ACCESS TO PATIENT INFORMATION

Centralized operations can be costly and may create delays in making documents available in the Hyland OnBase ECM. eCopy ShareScan complements centralized operations by turning scanners and MFPs across the facility into secure “on-ramps” to Hyland OnBase workflows. This accelerates access to patient data and provides clinicians with a more complete picture of the patient record.

STANDARDIZED CAPTURE TO REDUCE COSTS AND SUPPORT HIM PROTOCOLS

eCopy ShareScan’s intuitive user interface reduces training costs and allows HIM departments to shift the scanning of time sensitive documents from centralized operations to the existing scanners and MFPs closer to the point of care. With support for dynamic look-ups for data values in the OnBase ECM eCopy ShareScan can help ensure easy and accurate indexing of scanned records.

SIMPLIFIED ONBASE INTEGRATION

The eCopy Connector for OnBase was developed by the Hyland development team; guaranteeing seamless integration to OnBase. Hyland’s eCopy Connector supports direct lookups for quick retrieval of MRNs, Document Types, and other metadata from OnBase for easy document indexing at virtually any point of care scanning device.

Hyland’s eCopy Connector for OnBase supports easy document indexing at virtually any point of care scanning device.

ShareScan provides “Continuity of Capture” by standardizing the scanning processes across all devices to ensure records are captured and indexed in accordance with HIM protocols.

A FLEXIBLE SOLUTION TO MEET ALL OF YOUR CAPTURE NEEDS

As the world’s best-selling scanning and workflow solution for MFPs, and with additional connectors for popular business applications, eCopy ShareScan provides everything needed to automate paper-to-digital workflows in healthcare.

ABOUT NUANCE COMMUNICATIONS

Nuance Communications, Inc. is the market leader in creating clinical understanding solutions that drive smart, efficient decisions across healthcare. As the largest clinical documentation provider in the U.S., Nuance provides intelligent systems and services that improve the entire clinical documentation process—from the capture of the complete patient record to clinical documentation improvement, coding, compliance and appropriate reimbursement. More than 500,000 physicians and 10,000 healthcare facilities worldwide leverage Nuance’s award-winning, voice-enabled clinical documentation and analytics solutions to support the physician in any clinical workflow and on any device.

To learn how Nuance can help you meet your healthcare challenges, please visit www.nuance.com or contact your Nuance sales representative today.
